

Slicing 3D Figures

NAME _____

1. Name and sketch the 2-dimensional shape formed by the slice made by the plane through the cube shown below?

2. The cross section of a figure that was sliced **parallel to its base** is pictured below. Which could be the original figure?

- a. rectangular prism
- b. triangular prism
- c. cylinder
- d. square pyramid

3. The cross section of a figure that was sliced **parallel to its base** is pictured below. Which of the following could be the original figure?

- a. rectangular prism
- b. triangular prism
- c. cylinder
- d. square pyramid

4. Which figure has the horizontal and vertical cross sections below...

- a. right rectangular prism
- b. cylinder
- c. cone
- d. square pyramid

5. Select the figure that can be formed by a slice through the sphere.

- a. triangle
- b. circle
- c. square
- d. oval

6. Select all of the figures that can be formed by a vertical slice perpendicular to the base of the cone.

- a. acute triangle
- b. oval
- c. circle
- d. right triangle

7. Select all of the figures that can be formed by a vertical slice perpendicular to the bases of the cylinder.

- a. circle
- b. rectangle
- c. line segment
- d. oval

8. Jeremy was playing with his blocks and stacked them as pictured below...

Which image best shows the top view?
