

# Even More Practice Part 2 - Scatterplots

The table below represents the relationship between the number of miles two cities are apart and how much a plan ticket cost between the two cities.

1. Label each axis.
2. Scale the Graph.
3. Draw the line of best fit.
4. Write an equation for your line of best fit.

<b>X Distance (miles)</b>	<b>Y Airfare (\$)</b>
576	\$164
612	\$143
1,216	\$260
409	\$161
1,502	\$216
946	\$180
189	\$108
737	\$180
