

NAME _____

Learning Targets: Equations

7th Grade

	Equations			
1.	I can solve 1-step equations.			
2.	I can solve 2-step equations.			
3.	I can simplify expressions by combining like terms.			
4.	I can simplify expressions by distributing and then combining like terms.			
5.	I can solve multi-step equations.			
6.	I can solve multi step real- life equations that include different kinds of rational numbers.			
8.	I can write an equation in a simplest form that is based on a real-life situation.(Combining Like Terms) <i>Example: Total price of a car is $c + .06C = 1.06c$.</i>			
11.	I can estimate and use prior knowledge to make sure that my answer "makes sense" to the given question.			

7th Grade Vocabulary: Solving Equations

Word <i>coefficient</i>	Definition
Example	Non- Example
Synonym	Picture

Word <i>constant</i>	Definition
Example	Non- Example
Synonym	Picture
